Position Specific Summary:
The State Hygienic Laboratory (Iowa’s Environmental and Public Health Laboratory), at the University of Iowa, under contract with the Iowa Department of Public Health, has an exciting full-time opportunity for a Clinical Laboratory Analyst.

Conducts laboratory testing on clinical specimens or isolates for the purpose of disease diagnosis and treatment or surveillance. Ensures results are accurate and timely and that work is conducted under best laboratory practice and in compliance with CLIA regulations or other regulatory agency requirements as appropriate. Adheres to all laboratory safety and security policies.

The primary responsibility of the position is to perform diagnostic testing for identification of agents of infectious diseases using primarily molecular methods and possibly conventional microbial methods.

Schedule: Monday-Friday, 8:00am-5:00pm; Rotating Holiday and Weekend coverage is required.

Key Areas of Responsibilities and Specific Job Tasks

<table>
<thead>
<tr>
<th>Classification</th>
<th>Specific Job Duties and Tasks</th>
</tr>
</thead>
</table>
| **Technical Laboratory Capability** | • Meet CLIA qualifications for High Complexity testing.  
• Conduct testing for a variety of infectious diseases using molecular methods.  
• Participate in Proficiency testing.  
• Order supplies and reagents.  
• Assist with monthly reports.  
• Assist with validation of new test methods.  
• Assist with training new staff. |
| **Instrumentation and Technology** | • Perform routine use of the following equipment including calibration, preventive maintenance and troubleshooting:  
  o Thermo cyclers  
  o DNA sequencers  
  o Other molecular platforms |
| **Data Analysis, Reporting and Documentation** | • Perform CLIA regulated documentation of all patient and QC testing using manual worksheets and PHIMS as well as release of results.  
• Participate in verification/validation of new methods and protocols. |
| **Quality Control / Quality Assurance / Quality Improvement / Quality Assessment** | • Conduct QA/QC for all areas of competency according to CLIA requirements.  
• Troubleshoot and communicate any issues that arise and contribute to development of corrective actions.  
• Assure that CLIA, CDC, CAP, HIPPA, and administrative rules and regulations are followed |
| **Outreach and Communication** | • Provide test results to submitting facilities, health care providers and public health through written and verbal protocols.  
• Ensure verbal and written communication with coworkers is clear and concise |
## Financial Responsibility
- Maintain proper inventory and ensure requests for supplies are made within appropriate time frame to prevent any delays in testing. Suggest cost saving measures.
- Participate in test costing and other budget-related work as requested.

## Universal Competencies

<table>
<thead>
<tr>
<th>Competency Area</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Collaboration/Positive Impact</strong></td>
<td>Ability to work with a variety of individuals and groups in a constructive and civil manner and utilize existing resources and learning to achieve or exceed desired outcomes of current and future organizational goals/needs.</td>
</tr>
<tr>
<td><strong>Diversity, Equity and Inclusion</strong></td>
<td>Ability to work with a variety of individuals and groups in a constructive and respectful manner while appreciating the unique contribution of an inclusive workforce that brings together the talents of people across multiple identities, including: race, creed, color, religion, national origins, age, sex, pregnancy, disability, veteran or military status, sexual orientation, gender identity, or associational preferences.</td>
</tr>
<tr>
<td><strong>Service Excellence/Customer Focus</strong></td>
<td>Ability to meet or exceed customer service needs and expectations and provide excellent service in a direct or indirect manner. Ability to effectively transmit and interpret information through appropriate communication with internal and external customers.</td>
</tr>
</tbody>
</table>

## Technical Competencies

<table>
<thead>
<tr>
<th>Competency Area</th>
<th>Description</th>
</tr>
</thead>
</table>
| **Clinical Laboratory Testing**        | - Participates in collecting and processing specimens (e.g. blood) according to test requests.  
- Operates laboratory equipment required to examine clinical specimens.  
- Produces reports based on laboratory test results to help in further diagnosis.  
- Adheres to relevant policies and ethics for clinical laboratory testing.  
- Discusses major factors that can affect the accuracy of laboratory test results. |
| **Laboratory Equipment Operation**     | - Operates and calibrates laboratory equipment.  
- Examines equipment to detect signs of disrepair.  
- Helps others understand laboratory equipment safety and operating policies and procedures.  
- Documents defective equipment and reports it to an appropriate supervisor.  
- Utilizes quality control techniques to monitor and maintain laboratory equipment. |
| **Laboratory Practice Quality Assurance (LPQA)** | - Examines laboratory sample collection, handling and analyzation procedures.  
- Operates quality testing equipment and verifies collected data.  
- Adheres to related guidelines, regulations, standards and safety procedures in the LPQA process.  
- Handles actual or potential problems that affect the analytical results of an LPQA program.  
- Assesses laboratory equipment calibration and maintenance at various LPQA stages. |
| **Laboratory Results Reporting**       | - Selects from a variety of LRR technologies, e.g. Electronic Data Interchange (EDI).  
- Analyzes information exchange related problems (e.g. confidentiality and accuracy) in LRR.  
- Follows LRR policies and ethics, e.g. Health Insurance Portability and Accountability Act (HIPAA).  
- Explains how LRR supports the interoperability between health records and laboratory systems.  
- Creates secure access to laboratory results and their interpretations in a patient-focused manner. |

This description is intended to indicate the kinds of tasks and levels of work difficulty that will be required of positions that will be given this title and shall not be construed as declaring what the specific duties and responsibilities of any particular
position shall be. It is not intended to limit or in any way modify the right of any supervisor to assign, direct, and control the work of employees under his or her supervision. The use of a particular expression or illustration describing duties shall not be held to exclude other duties not mentioned that are of similar kind or level of difficulty.

As part of performing the key areas of responsibility and competencies described above, staff members are expected to meet reasonable standards of work quality and quantity, as well as expectations for attendance established by their supervisor. Staff members are also expected to comply with policies governing employee responsibilities and conduct, including those contained in the University Operations Manual.

**Proficiency levels are defined as:**

**Basic Application** - Uses basic understanding of the field to perform job duties; may need some guidance on job duties; applies learning to recommend options to address unusual situations.

**Working Experience** - Successfully completes diverse tasks of the job; applies and enhances knowledge and skill in both usual and unusual issues; needs minimal guidance in addressing unusual situations.

**Extensive Experience** - Performs without assistance; recognized as a resource to others; able to translate complex nuances to others; able to improve processes; focus on broad issues.

**Expert/Leader** - Seen as an expert and/or leader; guides, troubleshoots; has strategic focus; applies knowledge and skill across or in leading multiple projects/orgs; demonstrates knowledge of trends in field; leads in developing new processes.

**Position Qualifications**

<table>
<thead>
<tr>
<th>Education or Equivalency Required</th>
<th>Bachelor’s degree in Molecular Biology, Biotechnology, Genetics, Microbiology, Clinical Lab Science, or Biology, or related field or an equivalent combination of education and experience is required.</th>
</tr>
</thead>
